Air Ministry Numbers

A Brief Introduction

Air Ministry (or AM) numbers were allocated to Luftwaffe aircraft at their place of surrender in Germany or Denmark. On an airfield containing literally hundreds of German aircraft, this designation ensured that set aside aircraft were not destroyed.

Here is the US List:

The USA Numbers

A Brief Introduction

USA Numbers were allocated by RAF Intelligence teams to aircraft located in Northern Germany and Denmark. Details were then forwarded to Colonel Harold Watson and if required by the Americans the aircraft were handed over to the USAAF.

I wonder what the russians got, theres so many essential german aircraft that should become flyable. This list of allied ac is overwhelming compaired to the axis sets.

Thanks for the great post woofiedog, I wish more people posted aviation related threads.

LeadSpitter_ ... Very little in depth info is to be found about German Aircraft capture or taken as War Booty by the Soviet Army after WW2.

I'm sure it's out there though... just need a little more research.

But here are a few I did find.

Here are a couple of interesting links about Soviet Air Power and one about the Junkers Factories in Russia just before WW2:

ImpStarDuece... Thank's for the Bump!

But I have to admit... I've learned how to copy and Paste.

My typing skill's are... well you might say Poor!
