

Bf 109 losses in Spain

Current research indicates that the Legion Kondor lost a total of 40 Bf 109s (of a total of 131). Not all of these aircraft have been tied to pilots, or even names and locations; the list below contains only those aircraft for which comprehensive loss documentation exists. As discussed above, all aircraft produced between 6-4 and 6-19 are listed as 'Bf 109A', to differentiate from the later production B-1 models.
