I believe I./TrGr 186 flew Ju 87s while II./TrGr 186 used Bf 109Bs and Bf 109Es until they were incorporated into JG 77.

Stug, make sure you load the pics to the forum and not link to your computer. If you move the pics from your PC then they get lost here as well. Several of your posts were missing the pics.

Most of those are very nice, but a few of them are, IMO, just dumb. I mean, a pig??? Really? No animal strikes fear in the enemy more than a pig!

"I am a rear gunner for the flying swine!"

And that hippo looks like a nuclear experiment gone very wrong. I'm sure there is a story behind them but I'm surprised the guy that came up with those wasn't sent on an express train to the eastern front.
