

BALKAN DEFENDERS

Yugoslavian aerial victory credits of WW2

The lists

All the lists present the following data:

- Name and (when known) first name are presented with arbitrary choice for the spelling (russian, german, arab names...).
- RANK of the pilot: see the [rank page](#) for the meaning of the abbreviations and the equivalence.
- According to the pages, COUNTRY, NATION for the nationality or ethnic origin, AIR_SERVICE for the air arm, are provided.
- The number of victories represents usually the total of kills (individual plus shared). The shared kills are indicated when known under the form [indiv+shared]. The official score is indicated when different from the total (American and British scores of ww2 for example).
- Authors of the SOURCES column are given; report to the [bibliography page](#) to find the books, articles, web pages in alphabetical order. The OTHER_SOURCES column presents the divergent scores with sometimes the author of the source.
- The DETAIL column shows occasionally the type of kill, balloons, V-1s, ground kills, unconfirmed kills...
- The NOTE column exposes different commentaries and for lack of space, abbreviations are used: report to the [abbreviation page](#) for their meaning.

Updated: 25/01/2019

RANK	FIRST NAME	NAME	VICTORIES	SOURCES	DETAIL	NATIONALITY	AIR SERVICE	UNITS	DEATH	NOTE	OTHER SOURCES
