

CASE 1 : three diesels pump running with OLD Supercharge pump ONLY

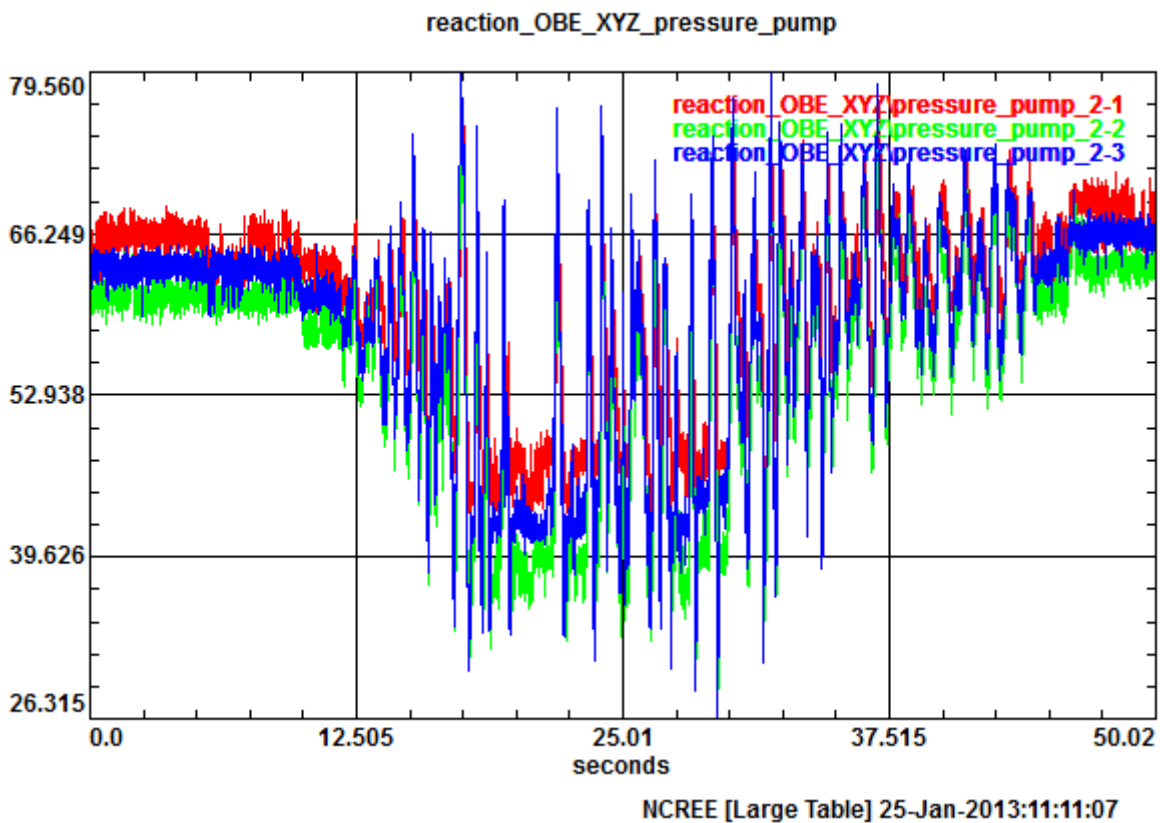

The following three diagrams were showing the three inlet pressure of diesel #2. If table was running with large motion test, the three inlet pressure of diesel pump #2 dropped from 55 psi to 15 psi quickly and diesel #2 stopped running (diesel #1, #3 were still running).

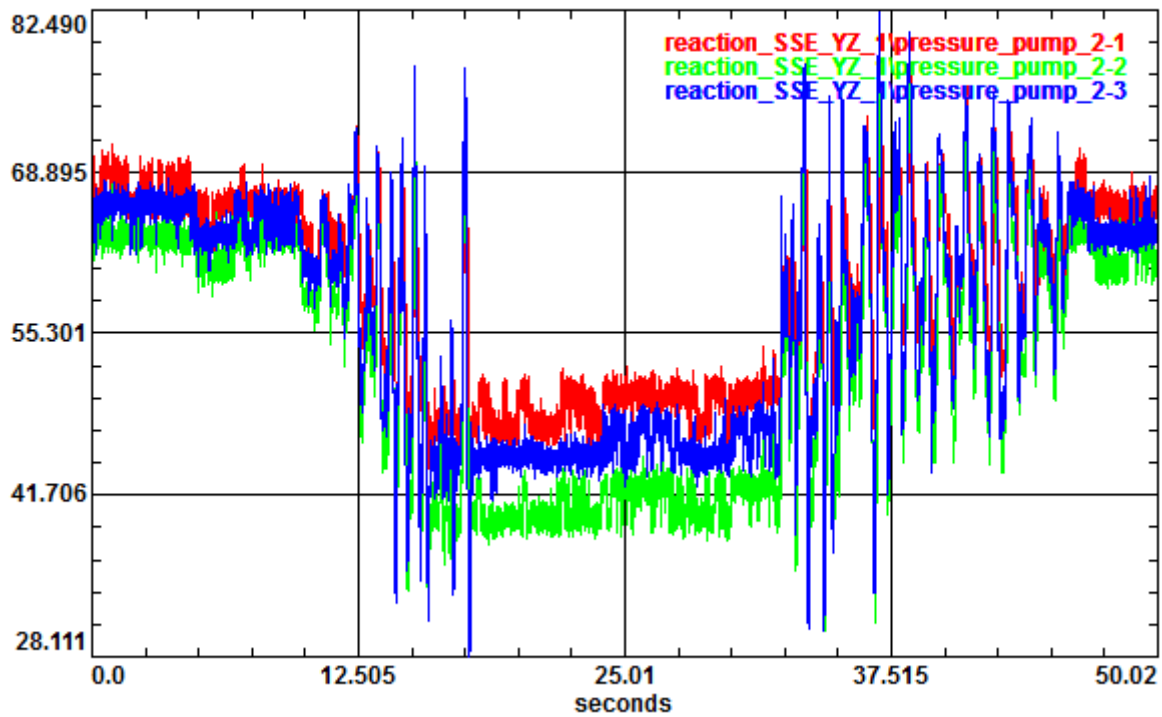

CASE 2 : three diesels pump running with OLD and NEW Supercharge pump

Like the case 1 description, the three inlet pressure of diesel pump #2 dropped from 60 psi to 45 psi and all three diesels were running safely.
